

# Daily routine to download the classroom materials

The following steps will have to be performed in order to update the new information uploaded to the Classroom materials repo.

Each day, on your terminals you will have to:

01

*git remote add upstream https://github.com/Ironhack-Data-0621-Remote/Classroom-Materials.git*

⚠ This step will be done only once ⚠

02

*git pull upstream master*  
*git add .*  
*git commit -m "update repo"*  
*git push origin master (or main)*

Download to my computer (local changes)

⚠ **We will have to do this daily** ⚠

03

*git add <filename>*  
*git commit -m "message"*  
*git push*

"

If I want, I make a copy of the jupyter with my own notes.
